

EXPERIENCE

Social Gravity AI, Inc.

Jan 2026 – Present

Founding Team Member (Engineering / Product)

Remote

- Building a live AI voice platform with a small founding team: a “digital twin” you can call and talk to.
- Co-built the embeddable web SDK with our CTO, putting the AI twin on any third-party website.
- Together we cut reply latency from **3–5s** to **under 1s**; beta hit **2,500** conversations, **73,000** minutes in 2 weeks.
- Now building an AI-powered link-in-bio platform with voice and chat.

Findable

Apr 2026 – Jun 2026

Co-Founder & Organic Growth Specialist

Remote

- Took [seedsupplier.de](#), a store doing **€30K–50K/month**, from invisible to cited in AI search.

UpSale, European Social Agency

Jul 2024 – Mar 2025

Head of Growth & Post-Production

Remote

- Video editor to Creative Direction; grew client Instagram accounts, including restaurants, to **10,000+** followers each, **50,000+** followers total.

PROJECTS

Showing 3 of 10 public repos – full list on [GitHub](#).

The Referee

Meta × PyTorch · Top 100 / 35,000

Tech: Python, PyTorch, GRPO, LoRA, Qwen 2.5, OpenEnv, FastAPI, Docker

- Fine-tuned Qwen 2.5 (1.5B) with GRPO + LoRA to catch two coding agents quietly drifting apart; no LLM judge.
- 2,000-step GRPO training run, deployed live via FastAPI and Docker on Hugging Face Spaces.

Steward

live

Tech: Python, FastAPI, React, Swift, SQLite, Telegram Bot API, Gmail OAuth

- Local-first AI agent that runs my Gmail and WhatsApp; ~**43,700** lines of Python, **1,023** tests.
- Fail-safe by design: never takes an irreversible action without one human tap.
- Ships with a native Swift macOS menu-bar app – I love building native tools for Apple platforms, and iOS is next.

Netra

Google DeepMind Hackathon · Top 20 Finalist

Tech: Computer Vision, CameraX, Gemma 3, LLM Gating, On-Device Inference, Multilingual

- AI companion for blind users that knows when *not* to talk: an LLM (Gemma 3) gates a continuous camera feed, only speaking up when it actually helps.
- On-device obstacle warnings, face recognition, currency detection, and fall SOS, across **6** Indian languages, fully offline.

EDUCATION

BITS Pilani

2024 – 2028

B.S. Computer Science

India

- CGPA: **8.21** / 10

TECHNICAL SKILLS

Languages

Python, C++, TypeScript, JavaScript, Java, Swift, Kotlin, SQL

AI & Agents

LLM apps & agents, fine-tuning (GRPO, LoRA), RL (PPO, MaskablePPO), evals, PyTorch

Backend & Frontend

FastAPI, Node.js, WebSockets, WebRTC, PostgreSQL / Supabase, SQLite, React, Vite

Ship & Tools

Git, Docker, Vercel, Railway, CI, Claude Code, Generative AI

ACHIEVEMENTS

- **Google DeepMind Bangalore Hackathon:** Top 20 Finalist, for Netra.
- **Meta × PyTorch Hackathon:** Top 100 of 35,000+ teams. **iQOO Hackathon:** Special Honour, for Drishti.
